THE PROFESSIONAL DISINFECTION.

Virucidal, bactericidal & fungicidal - effective against viruses, bacteria and fungi

safe

Consisting of simple and safe basic materials without alcohol - due to its composition, BEULCO Clean is not a hazardous substance.

99,9 %
effective

Fast and highly effective - inactivates viruses and kills bacteria demonstrably.

sustainable

Special manufacturing process without chemical additives.
BEULCO Clean decomposes by 100%.

efficient

One solution for a wide range of applications.
Clean the surface, spray it on, let it react, dry it. Ready.

TRUSTED SINCE 1950
experienced

70 years of experience in the fields of disinfection and drinking water supply.

made in germany

Ingredients and production made in Germany.

SURFACE DISINFECTION

Health-endangering germs such as viruses or bacteria can survive on surfaces sometimes for days, thus increasing the risk of disease transmission. For this reason, surface disinfection takes on a superior role in regular hygiene compared to hand disinfection.

Disinfectants based on alcohol are hazardous substances, easily flammable and can cause irritations. We have therefore consciously developed BEULCO Clean without alcohol and additives in the sense of sustainability.

GOOD TO KNOW

BEULCO Clean disinfectants are proven for years to disinfect drinking water and drinking water systems. In Europe there are strict rules regarding drinking water. The active ingredients of our disinfectant is conform to legal norms due to its characteristics and is listed in legal standards and registered with the Federal Institute for Occupational Safety and Health (BauA). As a national authority, the BauA implements the requirements of the European Chemicals Agency (ECHA).

APPLICATION AREAS

Office buildings and public buildings

Workplaces and regularly frequented areas such as break rooms, classrooms and kitchens should be cleaned and disinfected on a regular basis to meet the hygienic requirements and to protect people.

Production facilities

There are also many areas in production facilities that are used by many employees and external service providers. In addition to break areas, these are also e.g. machines and tools. As BEULCO Clean is not flammable, it can also be used there without any risk**.**

Sales and exhibition areas

Shop areas, information counters, advice desks, cash desk areas or information screens pose a risk for the transmission of germs due to the many contact possibilities. Here too, regular disinfection of the surfaces is recommended.

„We have been using BEULCO Clean in the commercial professional disinfection sector for a long time. With the further development to a surface disinfectant, it is now possible for every user to carry out safe, simple and effective disinfection.“

Michael Rutkowski
State-certified disinfector

CONTAINER SIZES

Individual for every application.

Spray bottle
100ml

Spray bottle
